

Fibre optic patch cords

FO-C FC/PC series

art. 19-089

FO-C FC/PC mt.50

Armoured single-mode fibre optic patch cords with FC/PC connectors, realized with LSZH sheath (Low Smoke Zero Halogen).

Thanks to their reduced thickness and the dielectric material of which they are composed, which makes them immune to electromagnetic interference, fibre optics can be inserted in electrical cables ducts.

Also, in a distribution network, they don't require equipotential grounding.

They assure a very low attenuation and a high transmission bandwidth.

Code		19-089
Item		FO-C FC/PC mt.50
Length	m	50
Ø patch cord	mm	2,8
Medium attenuation	dB/Km	0,4
Type of connectors		FC/PC
Ø connectors	mm	10
Type of fibre optic for wiring		single mode 9/125, armoured
Packaging dimensions (LxWxH)	mm	190x180x50
Packaging weight (LxWxH)	Kg	0,78
