

Outdoor amplifier 12V broadband input LOG series

art. 28-021
LOG 22 12V

Outdoor amplifier with broadband inputs, used in single dwelling, small TV systems or as a preamplifier in centralized TV systems.

This amplifier is designed to optimize the amplification of DTT signals in the range E05÷E48, attenuating the 700 MHz band without preventing the proper functioning of the channel E48.

Characterized by two broadband inputs for VHF+UHF bands amplification.

The amplification of VHF and UHF bands is realized with single line.
